VadaTech Partners with ECRIN Systems to Showcase Latest solutions for Defence, Aerospace and Security at Eurosatory

Southampton, UK and Paris, France – June 13, 2016 – VadaTech, a leading manufacturer of embedded boards, enabling software and application-ready platforms, has partnered with ECRIN Systems to showcase the latest VadaTech solutions for defence, aerospace and security at Eurosatory being held in Paris between the 13th and 17th June.

In Hall 5, stand J730 visitors will be able to see and learn about new Xilinx FPGA FMC carriers in the PCIe, VPX and AMC form factors, FMC analog-to-digital (ADC) and digital-to-analog (DAC) cards based on TI and Analog Devices technology, and rugged 1U platforms for sonar and radar applications.

Ian Shearer, Managing Director of VadaTech Limited, said: "Eurosatory is an exceptional opportunity to bring our expertise to the attention of prime contractors and subcontractors in the global defence, aerospace and security market. We are pleased to be working with ECRIN Systems at this exhibition and in providing sales and technical support to our joint customers in Europe."

Elie Gasnier, Vice President Sales, Marketing and Business Development at ECRIN Systems, said: "Working with VadaTech enables us to bring the most advanced technology to European integrators and contractors, especially in the field of FPGAs and data acquisition. I was honoured to attend the recent unveiling of VadaTech's new 900-square-metre European office in the UK, which underlines the company's commitment to the region."

Visitors to Eurosatory can request an appointment with experts from ECRIN Systems by contacting Caroline Frayssinet by phone (0) 1 69 07 83 22 or email caroline.frayssinet@ecrin.com

About ECRIN Systems

Founded in 1976 and employing a team of 13 engineers in research and development, ECRIN Systems has built its development around three major activities in embedded electronics for the French and European markets:

- Application-ready COTS and MOTS systems
- Subcontracting and ODM services
- COTS building blocks and system integration

About VadaTech

VadaTech provides innovative embedded computing solutions from board-level products, chassis-level platforms, to configurable application-ready systems. With a focus on AdvancedTCA, MicroTCA, VPX and PCIe solutions, the company offers unmatched product selection and expertise. A unique combination of electrical, mechanical, software, and system-level expertise, enables VadaTech to provide customized commercial or rugged computing solutions to meet the most complex customer requirements. VadaTech also offers specialized product solutions for VME, CompactPCI, and other architectures. A member of PICMG and VITA, VadaTech has headquarters, design and manufacturing facilities in Henderson, NV with design, support and sales offices in Europe and Asia Pacific.
