The AMC218 is a single-width, mid-height AdvancedMC^{TM} (AMC) based on the AMC.2 specification (full-height option available). The AMC218 provide six front panel 10/100/1000Mbit ethernet ports via MRJ-21. It has two additional GbE ports that are routed to the rear per the AMC.2 specification.

The switch is managed via http and supports a rich set of features such as VLAN, Spanning tree, QoS, Mirroring, etc.

VadaTech can modify this product to meet special customer requirements without NRE (minimum order placement is required).
