AMC242 Routing of Ports 4-15 and 17-20 to the Front Panel

Key Features
- Routing of Ports 4-7, 8-11, 12-15 and 17-20 to the front panel
- Protocol agnostic
- 16 Ports to the front panel
- 16 lanes to the backplane
- Front-panel I/O via SFP+ or QSFP+
- Single-module, mid-size (option for full-size and extended) per AMC.0
- IPMI 2.0 compliant

Benefits
- Provides front-panel access to fat pipes and extended options
- Design utilizes proven VadaTech subcomponents and engineering techniques
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
AMC242

The AMC242 is an AMC form factor which routes 16 lanes from the backplane to the front. The module is agnostic to the protocol, any protocol such as PCIe, SRIO, 40GbE, 10GbE, GbE, Aurora, etc. could be routed between the backplane and the front panel.

When operating at 40G, AMC242 is not recommended for configurations where backplane trace length from the signal source is greater than 2"/5cm, e.g. in 1U chassis. For such applications consider AMC240 or similar. Contract VadaTech sales for details.

The AMC242 has option for 4/8 SFP+ or 2/4 QSFP+. The QSFP+ ports have four lanes of TX/RX.

See Solution Brief for an overview of a 56 GSPS digitizer with IRIGB/GPS timestamping.

Front Panel

Figure 3: Mid-size SFP+ Option

Figure 4: Mid-size QSFP+ Option

Figure 5: Full-size SFP+ Option

Figure 6: Full-size QSFP+ Option

SFP+ options route a single port per connector. So, while the CBS supports 16 Ports to the front, only 8 of these are connected if an SFP+ option is selected. SFP+ can be populated with copper or fiber as required by the customer application.

Each QSFP+ connector supports four Ports, so the full-size QSFP+ option should be selected if all 16 Ports are required.

| **Software Support** | **Operating System** | Agnostic |

| **Other** | **MTBF** | MIL Hand book 217-F@ TBD hrs |
| **Certifications** | Designed to meet FCC, CE and UL certifications, where applicable |
| **Standards** | VadaTech is certified to both the ISO9001:2015 and AS9100D standards |
| **Warranty** | Two (2) years, see VadaTech Terms and Conditions |

### INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Choose VadaTech

We are technology leaders
• First-to-market silicon
• Constant innovation
• Open systems expertise

We commit to our customers
• Partnerships power innovation
• Collaborative approach
• Mutual success

We deliver complexity
• Complete signal chain
• System management
• Configurable solutions

We manufacture in-house
• Agile production
• Accelerated deployment
• AS9100 accredited
