Low Cost 26 Port 10 GbE and GbE ATCA Switch

ATC807

KEY FEATURES

- AdvancedTCA open standard form factor
- PICMG 3.1 compliant
- Managed Layer two 10GbE and 1GbE switch
- 10GbE to the Fabric channel for 15 Node slots (option 9 or 1 selectable per port basis)
- GbE to Base Interface for 15 Node slots plus two Shelf
- Eight SFP+ cages for 10GbE ports (each port can run as GbE or 10GbE)
- Eight front panel 10/100/1000 Mbit Ethernet ports via RJ-45
- VLAN-based packet filtering
- Packet classification using IEEE802.1p QoS
- 9K Jumbo frames
- Spanning tree
- Mirroring
- QoS
- SNMP and RMON
- OS support for:
  - OS independent

The ATC807 is a low cost AdvancedTCA 26 port of 10GbE and 26 ports of one Gigabit Ethernet switch that serves a number of egress ports with support for a rich set of Layer two managed software.

The module provides 8 ports of 10GbE via the front panel, two ports to the zone three, 15 port to the Fabric Channel and one port to the update channel. The 10GbE has a GbE routed to the one GbE switch.

Further, the module provides eight GbE ports in the front via RJ-45. In addition it has 15 ports routed to the Base Channel, two ports to the Shelf Manager and one port to the update channel. One of the front panel ports is routed to the 10GbE via a mux selection to allow the 1GbE and 10GbE to interface together. In addition two of the front panel ports have a mux selection which allows routing to Zone 3.

The IPMI management is utilizing VadaTech’s second generation IPMI management controller.
## SPECIFICATIONS

Low Cost 26 Port 10 GbE and GbE ATCA Switch

FIGURE 1. ATC807 Functional Block Diagram
Managed Layer Two 10/1GbE

Key features:

❖ Configuration
✦ Ethernet/IEEE 802.3 Packet size (64 bytes to 1522 bytes)
✦ Jumbo packets up to 9216 bytes

❖ L2 Switching
✦ Supports up to 8K MAC address
✦ Line rate switching for all packet sizes
✦ Independent VLAN learning
✦ VLAN flooding for broadcast and DLF packets
✦ Hardware-based address learning
✦ Six CPU-managed learning (CML) modes per port
✦ Software insertion/deletion/lookups of the L2 table
✦ Same port bridging supported
✦ Station movement control

❖ L2 Multicast
✦ 4K VLANs
✦ Protocol-based VLANs
✦ IEEE 802.1p
✦ IEEE 802.1Q
✦ Independent VLAN learning (IVL)
✦ Ingress filtering for IEEE 802.1Q VLAN security
✦ VLAN-based packet filtering
✦ MAC-based VLAN

❖ Source Port Filtering
✦ Egress port block masks
✦ Trunk group blocking masks

❖ Storm Control Per-Port:
✦ Unknown unicast packet rate control
✦ Broadcast packet rate control
✦ Multicast packet rate control

❖ Spanning Tree:
✦ IEEE 802.1D spanning tree protocol (single spanning tree per port)
✦ IEEE 802.1s for multi spanning trees
✦ IEEE 802.1w rapid spanning tree protocol-delete and/or replace per:
  ▪ Port
  ▪ VLAN
  ▪ Port, per VLAN
✦ Spanning tree protocol packets detected and sent to the CPU

❖ Double-Tagging:
✦ Unqualified learning/forwarding
✦ IEEE 802.1 Q-in-Q

❖ Mirroring
✦ Ingress/egress mirroring support
✦ Mirror-to-port receives the unmodified packet for ingress mirroring
✦ Mirror-to-port receives the modified packet for egress mirroring

❖ Content Aware Filter Processing
✦ Intelligent Protocol Aware processor with backward-compatible, byte-based classification option
✦ Parses up to 128 bytes per packet
✦ -512 ACL rules support
✦ Multiple matches and actions per packet
✦ ACL-based policing
✦ Ingress/egress port based filtering
✦ MAC destination address remarking
✦ Traffic class definition based on the filter
✦ Programmable meters allows policing of flows
✦ Metering granularity from 64 Kbps to 1Gbps
✦ Multiple look-ups per packet
✦ Metering support on ingress ports and CPU queues

❖ QoS Features
✦ Four CoS queues per port
✦ Per-port, per CoS drop profiles
✦ Port level shaping
✦ Traffic shaping available on CPU queues
✦ Programmable priority to CoS queue mapping
✦ Provides two levels of drop precedence per queue
✦ Strict Priority (SP), Weighted Round Robin (WRR), and Deficit round Robin (DRR) mechanisms for shaped queue selection

❖ DSCP
✦ DSCP-based prioritization
✦ Back pressure metering
✦ DSCP to IEEE 802.1p mapping

❖ Port Security
✦ Per port blocking
✦ Supports IEEE 802.1x
✦ MAC address blocking

❖ DoS Prevention
✦ Denial of Service detection/prevention

❖ Management Information Base
✦ SMON MIB, IETF RFC 2613
✦ RMON statistics group, IETF RFC 2819
✦ SNMP interface group, IETF RFC 1213, 2836
✦ Ethernet-like MIB, IETF RFC 1643
✦ Ethernet MIB, IEEE 802.3u
✦ Bridge MIB, IETF RFC 1493
