The ATC808 is a low cost AdvancedTCA 26 port Gigabit Ethernet switch that serves a number of egress ports with support for a rich set of Layer two managed software. The Management is done via http.

The module provides eight GbE ports in the front via SFP. This allows a mix of Fiber and Copper transceivers. In addition it has 15 ports routed to the Base Channel, two ports to the Shelf Manager and one port to the update channel.

The IPMI management is utilizing VadaTech’s second
