FMC157
Multi I/O FMC Module, Differential Input, LVDS with Isolated Output

Key Features
- Multiple I/O in single FMC form-factor
- LVDS and Isolated I/O
- 7 x Differential Inputs
- 5 x LVDS Input or Output
- 2x Isolated General-Purpose Output (GPO) at +12V

Benefits
- Single module to provide multiple I/O
- Utilizing commercially-available, standard high-density connector for ease of cabling
- All I/O types utilize differential signaling between the transceivers on the FMC and the FPGA on the carrier for optimal signal integrity across the FMC connector
- Programmable LVDS termination and routing
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
FMC157

The FMC157 is an FPGA Mezzanine Card (FMC) per VITA 57.1 standard, offering a small footprint and allowing for general-purpose I/O expansion. The FMC157 provides 7x Differential Input, 5x LVDS and dual Isolated General-Purpose Output (GPO) with drivers at +12V.

### INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

</table>

Notes:
*For use with carriers that require higher mating clearance, such as VadaTech AMC595.
**Conduction cooled; temperature is at edge of module. Consult factory for availability.

Choose VadaTech

We are technology leaders
- First-to-market silicon
- Constant innovation
- Open systems expertise

We commit to our customers
- Partnerships power innovation
- Collaborative approach
- Mutual success

We deliver complexity
- Complete signal chain
- System management
- Configurable solutions

We manufacture in-house
- Agile production
- Accelerated deployment
- AS9100 accredited
