UTC013
DC Power Module, 792 W (Double Width)

Key Features
- Double module, full-size per AMC.0
- Dual DC input -36 V DC to -75 V DC 792 W (available in 396 W)
- Available in UTCA.3 conduction cooled
- Two banks of 256K Flash for redundancy
- Hot swappable
- Dual IPMI bus
- 32-bit RISC processor
- Modules can be turned on without an MCH

Benefits
- Very low ripple voltage
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
The VadaTech UTC013 is a 792 W power module (available in 396 W) for use in a MTCA chassis. The power module runs at 95% efficiency when running at maximum load. This results in over 752 W available to the system. It is fully compliant with the MicroTCA.0 revision 1.0 specification; including dual-redundant I2C buses (IPMB-0).

The UTC013 is hot-swappable and fully redundant when used in conjunction with a second instance of the module. It provides power to the twelve slots, two MicroTCA Carrier Hubs (MCHs) as well as the Cooling Units (CUs).

Multiple temperature sensors are included on-board to monitor for over-temp conditions within the module. The current is continuously measured for each of the modules and reported to MCH for any fault.

Once installed in the system the firmware is upgradable via the shelf manager. The UTC013 can be configured to power and enable the modules without the presence of an MCH.

The UTC013 is IPMI 2.0 and HPM.1 compliant with optional IPMI commands including warm/cold reset, re-arm sensor events, get device GUID, and get/set the hysteresis, threshold, and/or sensor event enable. The PMs follow the ATCA specification in fail-over for redundant IPMB-0 and FRU LED control. The units also have power channel control, get power channel status, PM reset, get PM status, and PM heartbeat. Temperature and current sensors are also included.

### INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.
Ordering Options

UTC013 – ABC-000-0HJ

A = Power
1 = 396 W
2 = 792 W

B = Specification
0 = MTCA.0*
1 = MTCA.1
2 = MTCA.3

H = Temperature Range
1 = Commercial (0°C to +65°C)
2 = Industrial (–20°C to +70°C)
3 = Extended (–40°C to +80°C)

C = Module Size
0 = 6 HP, Standard
1 = 8 HP, Extended*

J = Conformal Coating
0 = No coating
1 = Humiseal 1A33 Polyurethane
2 = Humiseal 1B31 Acrylic

Notes: *For use with Vadatech 2U Chassis such as VT812 and VT814.

Related Products

UTC003
- 400 MHz RISC CPU with 64 MB DDR for MTCA Carrier Management Controller (MCMC) and Shelf Manager
- Single width, full height module per AMC.0
- Fail-over with dual UTC003 in system

UTC011
- Single-width, full-height module per AMC.0
- Dual 10 to 36 VDC input for 241 W option and 18 to 36 V DC input for 460 W option
- Two banks of 256K flash for redundancy

UTC020
- Single module, full-size per AMC.0
- Dual -36 V DC to -75 V DC input, 936 W (available in 468 W)
- Hot swappable with support for power module redundancy
