UTC025
DC Power Module, 936W

Key Features

- Single module, full-size per AMC.0
- Dual -36V DC to -75V DC input, 936W (available in 468W)
- Hot swappable with support for power module redundancy
- Dual IPMI bus
- Two banks of 256 K flash for redundancy

Benefits

- Highest power DC PSU for MTCA in industry (936W)
- Modifiable to rugged conduction-cooled version
- Very low ripple voltage
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
UTC025

UTC025 is a 936W power module (available in 468W) for use in a MTCA chassis. The power module runs at 95% efficiency when running at maximum load. This results in over 890W available to the system. It is fully compliant with the MTCA.0 revision 1.0 specification; including dual-redundant I2C buses (IPMB-0).

The UTC025 is hot-swappable and fully redundant when used in conjunction with a second instance of the module. It provides power to the twelve slots, two MTCA Carrier Hubs (MCHs) as well as the Cooling Units (CUs).

Multiple temperature sensors are included on-board to monitor for over-temp conditions within the module. The current is continuously measured for each of the modules and reported to MCH for any fault.

Once installed in the system the firmware is upgradable via the shelf manager. The UTC025 can be configured to power and enable the modules without the presence of an MCH.

VadaTech’s power modules have individual power status LEDs for each payload slot. Other indicator LEDs include MCH, Cooling Units, and Fuse.

INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Ordering Options

UTC025 – AB0-000-0HJ

A = Power

1 = 468W
2 = 936 W

B = Specification

0 = MTCA.0 (convection cooled)
1 = MTCA.0 (conduction cooled)
2 = MTCA.1 (retention screws)
3 = MTCA.2 (hybrid cooling)

H = Operating Temperature

1 = Commercial (–5°C to +55°C)
2 = Industrial (–20°C to +70°C)
3 = Extended (–40°C to +85°C)*

J = Conformal Coating*

0 = No coating
1 = Humiseal 1A33 Polyurethane
2 = Humiseal 1B31 Acrylic

Note: *Conduction cooled, temperature is at edge of module. Consult factory for availability.

Related Products

VT899

• MTCA System Platform 5” x 7U x 9” deep (with handles 10” deep)
• Up to six AMCs. Six full size single width or 3 full size double width
• Radial 12C bus to each AMC

UTC003

• 400 MHz RISC CPU with 64 MB DDR for MTCA Carrier Management Controller (MCMC) and Shelf Manager
• Single width, full height module per AMC.0
• Fail-over with dual UTC003 in system

VT811

• MTCA System Platform 19” x 8U x 14.9” deep (with handles 16.23” deep)
• Full redundancy with dual MTCA Carrier Hub (MCH), dual Cooling Units and quad Power Modules
• Up to twelve AMCs. 12 front mid-size double module slots and RTM slots

Choose VadaTech

We are technology leaders
• First-to-market silicon
• Constant innovation
• Open systems expertise

We commit to our customers
• Partnerships power innovation
• Collaborative approach
• Mutual success

We deliver complexity
• Complete signal chain
• System management
• Configurable solutions

We manufacture in-house
• Agile production
• Accelerated deployment
• AS9100 accredited
