VPX984

Chassis Manager carrier for 3U VPX based on VadaTech VT042 Module

Key Features

- Quad ARM Cortex-A53 @ 1.6 GHz per core
- 4GB LP-DDR4 memory
- FRAM for log messages
- 64 NAND Flash
- I2C Real Time Clock with battery backup
- Low power (2W)
- Based on the VadaTech VT042 Module
- IPMI 2.0 compliant

Benefits

- Supports VITA 46.11 Tier-2 command set
- Utilizing VadaTech VT042 fourth generation Shelf
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
VPX984

The VadaTech VPX984 Chassis Manager is based on the VITA 46.11 specification. The VITA 46.11 leverages the Intelligent Platform Management Interface (IPMI) and AdvancedTCA Specification by PICMG as its architectural foundation. The VPX984 is a carrier for VadaTech VT042 Module which provides all the health management to the VPX system. VT042 - System Management for VPX Chassis, 4th Generation (vadatech.com).

The VadaTech Chassis Management solution is derived from our field proven VadaTech ATCA Shelf Manager utilizing core interfaces such as the Simple Network Management Protocol (SNMP), Remote Management Control Protocol (RMCP), Web Interface, System Management application (Scorpionware™), and a user-friendly Command Line Interface.

The VadaTech Chassis Management solution is derived from our field proven VadaTech ATCA Shelf Manager utilizing core interfaces such as the Simple Network Management Protocol (SNMP), Remote Management Control Protocol (RMCP), Web Interface, System Management application (Scorpionware™), and a user-friendly Command Line Interface.

The Module has GbE as 1000Base-TX to the front panel connecting to the Shelf Manager or as GbE to P1 as 1000Base-BX (SERDES Based). The module also had 10/100 Ethernet port in the front as well as 10/100 Ethernet going to P2 connector for fail over between two VPX984. The P2 connector also carries further signals for fail over between the two modules for full fail over.

The module allows the P1 and/or P2 to be installed as load option for chassis that don’t route the signals.

Front Panel View
Scorpionware™ Software

VadaTech’s Scorpionware™ software can be used to access information about the current state of the Shelf or the Carrier, obtain information such as the FRU population, or monitor alarms, power management, current sensor values, and the overall health of the Shelf. The software GUI is very powerful, providing a Virtual Carrier and FRU construct for a simple, effective interface.

IPMI Protocol Analyzer

VPX984 can be used as an IPMI protocol analyzer. Figure 4 shows the trace viewer output from VPX984.

Specifications

| Architecture | Physical Dimensions | 3U, 1" pitch |
| Module Management | IPMI | VadaTech VPX Shelf Manager and JTAG Switch Module |
| Configuration | Power | VPX984 ~2W |
| | Environmental Temperature | See Ordering Options |
| Other | MTBF | MIL Hand book 217-F@ TBD hrs |
| | Certification | Designed to meet FCC, CE and UL certifications, where applicable |
| | Standards | VadaTech is certified to both the ISO9001:2015 and AS9100D standards |
| | Warranty | Two (2) years, see VadaTech Terms and Conditions |

INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Choose VadaTech

We are technology leaders
• First-to-market silicon
• Constant innovation
• Open systems expertise

We commit to our customers
• Partnerships power innovation
• Collaborative approach
• Mutual success

We deliver complexity
• Complete signal chain
• System management
• Configurable solutions

We manufacture in-house
• Agile production
• Accelerated deployment
• AS9100 accredited
