VT073

Double Tongue Backplane for AMC Modules

Key Features

- Double tongue AMC backplane
- Tongue 2 provides additional power for high performance modules
- Provides +12V and Management Power to the AMC Module
- Port 0 and 1 are routed to the GbE PHY
- Three M3 Mounting holes to mate to any frame size

Benefits

- Low-cost test/dev board for AMC modules
- Design utilizes proven VadaTech subcomponents and engineering techniques
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
VT073

The VT073 is a double tongue backplane which allows any AMC.1, AMC.2, AMC.3 or AMC.4 to be utilized. The board is ideal for low-cost testing/development of high-performance AMC modules that require extra power via tongue 2.

The VT073 requires +12V input power (connector part number 1586039-6 from TE) applied from an external power supply.

### INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

- Twelve mid-size single module AMC slots (option for double-width modules)
- Dual MicroTCA Carrier Hub (MCH)
- PinoutPlus™ support, 2nd tongue on all AMC slots
Choose VadaTech

We are technology leaders
• First-to-market silicon
• Constant innovation
• Open systems expertise

We commit to our customers
• Partnerships power innovation
• Collaborative approach
• Mutual success

We deliver complexity
• Complete signal chain
• System management
• Configurable solutions

We manufacture in-house
• Agile production
• Accelerated deployment
• AS9100 accredited
