VT841 – μTCA 1U Chassis Platform, 6 AMC Slots

**KEY FEATURES**
- MicroTCA 1U 19” rack mount chassis platform
- Six mid-size AMC slots per 1U Carrier or two double module mid-size with two mid-size AMC slots
- Management can run as Shelf/MCMC (MicroTCA Carrier Management Controller) or MCMC
- AMC.1, AMC.2, AMC.3, AMC.4 compliant
- PCIe, SRIIO, 10GbE available on ports 4-7 and 8-11
- GbE Managed Layer Two (ports 0 and 1)
- Telco Alarm and Carrier Locator
- Telecom/GPS Clock on TCLKA, TCLKB, TCLKC and TCLKD and Fabric Clock on FCLK
- Redundant Cooling Units (CU)
- Removable Power Supply, Air Filter and Fan Trays
- IPMI 2.0 compliant
- RoHS compliant

The VT841 is a 1U μTCA chassis that provides six mid-size AMC slots that can accept any of the following Fabrics: PCIe, SRIIO or 10GbE on ports 4-7 and 8-11, AMC.2 (ports 0 and 1) and AMC.3 (ports 2 and 3 are routed to adjacent slots). The chassis also routes ports 12-15 to 17-20 of the adjacent slot. It provides FLCK, TCLKA, TCLKB, TCLKC and TCLKD to each AMC.

The VT841 has redundant Cooling Units. The Air Filter and Fan Trays are all hot swappable. The Power Entry Module (PEM) is removable for ease of serviceability.

The VT841 runs VadaTech proven second generation Management software based on its VT002 product. The shelf manager implements IPMI management, FRU management, and shelf environment management for power, thermal, E-keying, etc. The VT002 can run as the Shelf/MCMC or MCMC.

The input power is from DC (-36V to -75V) or Universal AC.

**Benefits of Choosing VadaTech**
- 1U chassis in 19” rackmount
- Scorpionware Shelf Management Software included at no additional cost
- Electrical, mechanical, software, and system-level expertise in house
- Full ecosystem of front and rear boards, enclosures, specialty modules, and test/dev products from one source
- AS9100 and ISO9001 certified company
COOLING AND TEMPERATURE SENSORS
The VT841 has intelligent Cooling Units that are removable. The cooling airflow is from right to left. There are Temperature sensors throughout the chassis that monitors the intake and the outtake air temperature.

SCORPIONWARE™ SOFTWARE
VadaTech’s Scorpionware software can be used to access information about the current state of the Shelf or the Carrier, obtain information such as the FRU population, or monitor alarms, power management, current sensor values, and the overall health of the Shelf. The software GUI is very powerful, providing a Virtual Carrier and FRU construct for a simple, effective interface.

FRONT PANEL
The VT841 front panel provides six AMC slots. The front I/O interface provides out of band 10/100 Ethernet (it interfaces to the Shelf Manager/MCMC directly), Serial interface (RS-232) to the Shelf Manager/MCMC, Dual GbE to the on-board GbE Switch, Serial interface (RS-232) to the power module, GPS/Telco clock, as well as provide status indication such as Telco Alarm, Health Monitoring LED, etc.

MANAGED LAYER2 GBE
The GbE layer two managed switch fabric routes GbE to each of the AMC slots. The GbE fabric has an interface to the on-board Carrier/Shelf manager. It also has a port routed to the front for uplink. Ethernet/IEEE 802.3 Packet size (64 bytes to 1522 bytes) with Jumbo packets up to 9216 bytes.

TELECOM, GPS AND FABRIC CLOCKS
The μTCA specification defines a set of clocks for Telecom and non-Telecom applications. The VadaTech VT841 has the most sophisticated clocking distribution in the market to meet the most stringent requirements such as wireless infrastructure, high speed A/D, etc. The VT841 has three types of clocks defined:

- Telecom clock
- GPS clock
- Fabric clock

The VT841 has two SMA clock connectors on the front panel. One is used as an external reference clock and the second one is an output for expansion. This provides the most flexibility to the overall system architecture.

10 GBE LAYER 3 MANAGED SWITCH
The 10GbE switch fabric is layer two/three managed and each of the AMC modules has a 10GbE interface to the Fabric. This switch has the richest set of features in the market by running carrier grade management software under Linux.

FABRICS ON PORTS 4-7 AND 8-11
The VT841 supports the following fabrics:

- PCIe Gen 2
- 10 GbE layer three managed (option for unmanaged)
- SRIO

BACKPLANE CONNECTIONS

NOTE: Since the PCIe Fabric has 12 ports of x4 (48 lanes total) there is option to run all the ports as x8 (on ports 4 to 11) or single dual x4. With the SRIO there are two options, SRIO x4 on all the ports 8-11 or on slots B2 and B3 only.

### INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of ATCA and µTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTM), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.
