VTX980

One Slot 3U VPX Benchtop Development Chassis with RTM (P0 to P2 installed)

Key Features

- One slot benchtop 3U VPX development platform
- Variable fan speed control for front and rear
- Support for conduction cooled modules
- Removable panels for ease of access for probing
- P0 to P2 connectors are installed
- Support for Rear Transition Modules (RTMs)
- Allows for a shelf manager to do health monitoring
- JTAG connector
- User setting of SYSRESET, NVMRO, etc.
- Onboard battery pack to provide the VBAT
- Vertical or Horizontal positioning on bench

Benefits

- Optional shelf manager supporting Tier 2 Health Management
- 750W AC Power supply
- Ease of access to board under development
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
VTX980

The VTX980 is a single slot 3U VPX chassis for board bring-up and testing of 3U VPX modules. The chassis can accept a front and a rear module (5 HP or 10 HP). The panels on both the front and rear slots are removable for ease of probing and debugging. **The VTX980 can support conduction cooled modules per VITA 48.**

The VTX980 can be placed on bench in both horizontal and vertical positioning for ease of access.

**Power Supply**

The VTX980 Universal AC power supply provides 750W to the chassis. The chassis supplies all the necessary power (+12V, -12V, +5V, etc.) to the module in accordance with VITA 46 specifications.

The unit also comes with a battery pack which provides the VBAT to the module. The power to VBAT can be switched between the onboard battery pack and the power supply. A sense resistor is fitted to each rail so that a voltmeter can measure power consumption.

**Cooling**

Variable speed fans provide front and rear cooling to the module. Chassis can optionally be configured to accept a conduction cooled module with wedge-locks, with airflow cooling heatsink to keep wedge-lock junction at required temperature. (RTMs remain standard/air-cooled in this configuration.)

**Backplane**

The backplane provides all the necessary VITA 46 signals set by the user (NVMO, SYSRESET, SYS_CON, driver the dual clock, etc.). All the connectors are installed P0 thru P6 and are routed from the front to the rear.

**Health Monitoring**

The dual IPMI bus is routed to an external VT007 bench-top shelf manager that monitors the VPX board sensors in compliance to VITA 46.11. The VT007 supports Tier 2 Health Management and can be ordered separately or as an option with VTX980.

**JTAG**

The backplane breaks-out the JTAG signals via a header connector to enable external connection of a JTAG probe.

**INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS**

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Choose VadaTech

We are technology leaders
• First-to-market silicon
• Constant innovation
• Open systems expertise

We commit to our customers
• Partnerships power innovation
• Collaborative approach
• Mutual success

We deliver complexity
• Complete signal chain
• System management
• Configurable solutions

We manufacture in-house
• Agile production
• Accelerated deployment
• AS9100 accredited
