VTX995

Two Slot 6U VPX Rackmount Chassis with RTM for Conduction Cooled Module

Key Features

- Two slot 6U VPX platform for Conduction cooled modules
- 19” Rackmount
- Multiple backplane configurations for VITA 66.4, VITA 66.5, VITA 67.2, etc. by selectable connector options
- Chassis monitors the temperature of the wedgelock and maintains the required level
- Support for Rear Transition Modules (RTMs)
- Health monitoring via shelf manager
- JTAG connector
- User setting of SYSRESET, NVMRO, etc.
- VBAT provided by onboard battery pack

Benefits

- Allows development of conduction cooled modules in standard 19” rack mount
- Shelf manager supports Tier 2 Health Management
- 400W AC Universal Power supply
- Ease of access to board for debug and development
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company
VTX995

The VTX995 is a dual slot 6U VPX chassis conduction cooled for two 6U VPX modules. The chassis can accept a front and a Rear Transition Module (RTM).

The Chassis CPU will monitor and maintain the VPX module wedge temperature, set by the user. This allows testing of the conduction cooled modules without going through the thermal chamber.

The chassis has provision to mount to a 19” Rackmount.

Power Supply
The VTX995 Universal AC power supply provides 400W to the chassis. The chassis supplies all the necessary power (+12V, -12V, +5V, etc.) to the module in accordance with VITA 46 specifications.

A battery pack is included that provides VBAT to the module. The chassis provides the current draw on the +12V and +5V by the VPX module and its associated RTM.

Cooling
Variable speed fans controlled by the onboard CPU keeps the wedge at the user defined temp.

Backplane
The backplane provides all the necessary VITA 46 signals set by the user (NVMRO, SYSRESET, SYS_CON, drive the dual clock, etc.). All the connectors are installed P0 thru P6 and are routed from the front to the rear. The backplane can be ordered with custom routing between the two modules. The default routing, routes all P1 ports between the two modules.

Health Monitoring
The chassis comes with the VadaTech 4th Generation shelf manager (VT040) that monitors the VPX board sensors in compliance to VITA 46.11. The VT040 supports Tier 2 Health Management and comes with the VTX995 chassis. For a more complete and detail description of the VT040, the data sheet may be downloaded from VadaTech web page.

JTAG
The backplane breaks-out the JTAG signals via a header connector to enable external connection of a JTAG probe.

INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Choose VadaTech

We are technology leaders
• First-to-market silicon
• Constant innovation
• Open systems expertise

We commit to our customers
• Partnerships power innovation
• Collaborative approach
• Mutual success

We deliver complexity
• Complete signal chain
• System management
• Configurable solutions

We manufacture in-house
• Agile production
• Accelerated deployment
• AS9100 accredited
