### **VadaTech Launches New User-Friendly Web Site**

Henderson, NV – Apr 01, 2014 – VadaTech, a manufacturer of embedded boards and complete application-ready platforms, has a new Web site designed for usability and content-rich features.

The new Web site ([www.vadatech.com](http://www.vadatech.com)) features navigation from both a product function and a technology form factor. This allows users to search for common architectures like MicroTCA, VPX, and AdvancedTCA or by products such as FPGAs, processors, switches, and more. The site also has a convenient Search tool allowing the user to delimit selections down to specific products or simply type in a base part number.

The VadaTech Web site includes many referrals to related products and content. Each product page has links to white papers, articles, newsletters, etc. The company has a continuous improvement program to provide a better customer experience every quarter. Many of these improvements will include new features to the site. Upcoming features include a blog and video section, and a log-in area for more detailed technical information.

For more information on VadaTech's Web site, visit [www.vadatech.com](http://www.vadatech.com)

#### **About VadaTech**

VadaTech provides innovative embedded computing solutions from board-level products, chassis-level platforms, to configurable application-ready systems. With a focus on MicroTCA and AdvancedTCA solutions, the company offers unmatched product selection and expertise in the full xTCA ecosystem. With our unique combination of electrical, mechanical, software, and system-level expertise, VadaTech can provide customized commercial or rugged computing solutions to meet the most complex customer requirements. VadaTech also offers specialized product solutions for VPX/VME, CompactPCI, and other architectures. A member of PICMG and VITA, VadaTech is headquartered in Henderson, NV with offices in Europe and Asia Pacific.
