

AMC582

Xilinx Zynq® UltraScale+ FPGA,
FMC+ Carrier, AMC

AMC582

Key Features

- Xilinx Zynq® UltraScale+ XCZU7EV FPGA
- Single FMC+ site (VITA 57.4)
- 8 GB of 64-bit wide DDR4 Memory (single bank) with ECC
- 8 GB of dual bank of 32-bit wide DDR4 to Fabric
- MPSoC with block RAM and UltraRAM
- SD Card (option)
- 128 MB of boot Flash
- 64 GB of user Flash

Benefits

- FMC+ site on a single module AMC
- Zynq UltraScale+ MPSoC
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company

vadatech
THE POWER OF VISION

AdvancedMC™

AMC582

The AMC582 is an AMC FPGA Carrier with a single FMC+ (VITA 57.4) interface. The AMC is compliant to AMC.1, AMC.2 and AMC.4 specifications. The unit has an onboard, re-configurable FPGA which interfaces directly to the AMC FCLKA, TCLKA-D, FMC DP0-15 and all FMC LA/HA/HB pairs (the module does not support HSPCe connector of the FMC+).

The FPGA has interface to a DDR4 memory channel (64-bit wide with ECC). Further the module has dual bank of DDR4 x32 to the fabric (total of 8 GB). This allows for large buffer sizes to be stored during processing as well as for queuing the data to the host.

The AMC is based on Xilinx UltraScale+ XCZU7EV MPSoC FPGA with single FMC site. The FPGA has 1,728 DSP Slices and 504k logic cells.

The XCZU7EV includes quad-core ARM application processor, dual-core ARM real-time processor and Mali™ graphics processing unit, as well as 6 Mb of block RAM and 27 Mbit of UltraRAM. An integrated H.264/H.265 video codec is capable of simultaneous encode and decode up to 4Kx2K (60 fps) for embedded video applications.

The module has onboard 64 GB of Flash, 128 MB of boot flash and an SD Card as an option.

Reference Design

VadaTech provides an extensive range of Xilinx based FPGA products. The FPGA products are in two categories; FPGA boards with FMC carriers and FPGA products with high speed ADC and DACs. The FPGA products are designed in various architectures such as AMC modules, PCIe cards and Open VPX.

VadaTech provides a reference design implementation for our FPGAs complete with VHDL source code, documentation and configuration binaries. The reference design focuses on the I/O ring of the FPGA to demonstrate low-level operation of the interconnections between the FPGA and other circuits on the board and/or backplane. It is designed to prove out the hardware for early prototyping, engineering/factory diagnostics and customer acceptance of the hardware, but it does not strive to implement a particular end application. The reference VHDL reduces customer time to develop custom applications, as the code can be easily adapted to meet customer's application requirements.

The reference design allows you to test and validate the following functionality (where supported by the hardware):

- Base and Fabric channels
- Clocks
- Data transfers
- Memory
- User defined LEDs

Xilinx provides Vivado Design Suite for developing applications on Xilinx based FPGAs. VadaTech provides reference VHDL developed using the Vivado Design Suite for testing basic hardware functionality. The reference VHDL is provided royalty free to use and modify on VadaTech products, so can be used within applications at no additional cost. However, customers are restricted from redistributing the reference code and from use of this code for any other purpose (e.g. it should not be used on non-VadaTech hardware).

The reference VHDL is shipped in one or more files based on a number of ordering options. Not all ordering options have an impact on the FPGA and a new FPGA image is created for those options that have direct impact on the FPGA. Use the correct reference image to test your hardware. For more information, refer to the FPGA reference design manual for your device which can be accessed from customer support site along with the reference images.

Supported Software

- Default FPGA image stored in flash memory
- Linux BSP
- Build Scripts
- Device Driver
- Reference application projects for other ordering options

The user may need to develop their own FPGA code or adapt VadaTech reference code to meet their application requirements. The supplied pre-compiled images may make use of hardware evaluation licenses, where necessary, instead of full licenses. This is because VadaTech does not provide licenses for the Vivado tool or Xilinx IP cores, so please contact Xilinx where these are required.

Xilinx also provides System Generator tools for developing Digital Signal Processing (DSP) applications.

See the following links:

[Xilinx Vivado Design Suite](#), [Xilinx System Generator for DSP](#).

Specifications

Architecture	
Physical	Dimensions Single module, mid-size (full-size optional) Width: 2.89" (73.5 mm) Depth 7.11" (180.6 mm)
Type	AMC FPGA Carrier Xilinx Zynq® UltraScale+ with FMC+ site
Standards	
AMC	Type AMC.0, AMC.1, AMC.2 and AMC.4
Module Management	IPMI IPMI v2.0
GbE	Lanes Port 0 and 1
PCIe	Lanes Ports 4-7/8-11 (x4) or Ports 4-11 (x8)
10GbE/40GbE/SRIO	Ports 4-7 and Ports 8-11
Configuration	
Power	AMC582 ~25W FPGA load dependent and no FMC
Environmental	Temperature See Ordering Options and Environmental Spec Sheet Storage Temperature: -40° to +85°C
	Vibration Operating 9.8 m/s ² (1G), 5 to 500 Hz on each axis
	Shock Operating 30G on each axis
	Relative Humidity 5 to 95% non-condensing
Front Panel	Interface Connectors Single FMC Slot Dual micro USB for RS-232 (management and CPU)
	LEDs IPMI management control Debug (user defined) LED
	Mechanical Hot-swap ejector handle
Software Support	Operating System Linux
Other	
MTBF	MIL Hand book 217-F@ TBD hrs
Certifications	Designed to meet FCC, CE and UL certifications, where applicable
Standards	VadaTech is certified to both the ISO9001:2015 and AS9100D standards
Warranty	Two (2) years, see VadaTech Terms and Conditions

INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Notes:

*Conduction cooled; temperature is at edge of module. Consult factory for availability.

For operational reasons VadaTech reserves the right to supply a higher speed FPGA device than specified on any particular order/delivery at no additional cost, unless the customer has entered into a Revision Lock agreement with respect to this product.

Choose VadaTech

We are technology leaders

- First-to-market silicon
- Constant innovation
- Open systems expertise

We commit to our customers

- Partnerships power innovation
- Collaborative approach
- Mutual success

We deliver complexity

- Complete signal chain
- System management
- Configurable solutions

We manufacture in-house

- Agile production
- Accelerated deployment
- AS9100 accredited
