The ART112 is a Rear Transition Module (RTM) module for ATCA Blades with Common Pinout definition on Zone three such as Sun Microsystems Netra CP3260, CP3220, VadaTech ATC114, etc. It brings expandability to the Blades/Carriers via Rear I/O. The ART112 has a 2.5" SAS/SATA drive for storage, a SAS Expander connector, VGA, and USB 2.0 high speed ports.

Further, the ART112 routes the front Blade GbE ports, RS-232 port and the LAN management to the rear transition. The GbE has options for copper or LC Fiber. The Fiber is available in SX (short reach) or LX (long reach).

The GPU (Graphic Processing Unit) is 2D 24-bit color with up to 1920x1200 resolution. The GPU has 128MB of DDR memory.

The USB is 2.0 with three ports of High-Speed (480Mbits/s).

The SAS HBA has one port routed to the on board disk and four ports routed to the I-PASS connector for expandability.

VadaTech can modify this product to meet special customer requirements without NRE (minimum order placement is required).
